

GEDA MAXI 120/150 S

Scaffolding assembly hoist

The Maxi 120/150 S is a rope hoist designed especially for scaffolders. It is also suitable for other trades, such as roofers, plasterers and painters.

The Maxi 120/150 S has two lifting speeds, an overload protection and a slack rope switch as well as a variety of different load receptacles.

It is fast to assemble and the ideal tool for safely transporting scaffold components and building materials up a scaffold.

The drive unit is easily mounted at the bottom of the scaffold, and the lightweight swivel arm is installed at the desired height at the top of the scaffold.

The maximum working height of 40m can be extended to 76m if you install the winch higher up the scaffold.

Technical Data	Maxi 120 S	Maxi 150 S
Load capacity	120kg	150kg
Lifting height	40m/76m	40m/76m
Electrical power supply	110 V/230 V/1.35 kW/1x16 A	230 V/1.35 kW/1x16 A
Lifting speed	20/60 m/min	15/45 m/min
