April 2010

Faster – lighter – wider

The new 1.09 m wide Allround

STAR Frame *HS*

Cut-outs in the corner plates for easy use of the O-lift-off preventer.

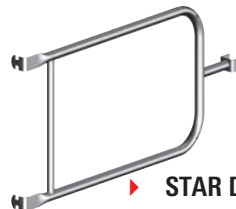

Corner plate for increased stiffness of the frame. The large cut-out ensures the fastening of scaffolding anchors with couplers.

Take advantage of the assembly speed of the Layher SpeedyScaf and combine it with the ingenious flexibility of Allround Scaffolding.

The new 1.09 m wide Allround STAR Frame HS in U and O variant ensures large time savings and assembly benefits while erecting façade or birdcage scaffolding.

Compared with assembly with separate Allround components, you reach **large time savings and 33 % weight saving** by using the new STAR Frame HS.

Two guardrail bars are on each side of the frame. Because of that, inner guardrails are fastened without tools in no time at all.

▶ STAR Double end guardrail, 1.09 m

▶ U-STAR lift-off preventer, 1.09 m

Your Benefit:

- ▶ Fast erection of birdcage scaffolding.
- ▶ All STAR benefits are now also available for 1 m wide façade scaffolding!
- ▶ Quick inner guardrail fixing.

Description	Dimensions L x W [m]	Weight approx. [kg]	Ref. No.
▶ Allround U-STAR-Frame HS, steel	2.00 x 1.09	21.0	2602.003
▶ Allround O-STAR-Frame HS, steel	2.00 x 1.09	19.5	2602.004
▶ STAR Double end guardrail, steel	1.09	5.6	2602.018
▶ U-STAR lift-off preventer, steel	1.09	2.1	2602.017

All dimensions and weights are guideline values. Subject to technical modification. Our deliveries shall only be made exclusively in accordance with our currently valid General Terms of Sale. Prices are ex works and plus legally rate of VAT.
Note: The general building authority approval for the STAR Frame HS has been applied for from the DIBt (German Civil Engineering Institute).
