

GEDA RUBBISH CHUTES

GEDA[®]
ORIGINAL

Tough and durable - Compared to ordinary rubbish chutes, the wear resistant GEDA rubbish chute has an extremely long working life thanks to its 6mm walls and the additional 3mm anti-wear ribs. Made from high quality, light weight, highly shock-resistant plastic, GEDA rubbish chutes can be fixed to scaffolds, walls, inclined roofs or flat roofs. The design also makes for efficient stacking.

Versatile and efficient - GEDA rubbish chutes are equipped with a double hook and an efficient fixing device, allowing for fast and safe connection. Chute branch sections allow access from several levels. Various accessories are also available, such as special clamps for windows or parapet walls, and dust free collars for use in public areas. Tested for use up to 40m.
