

# FEATURED JOB

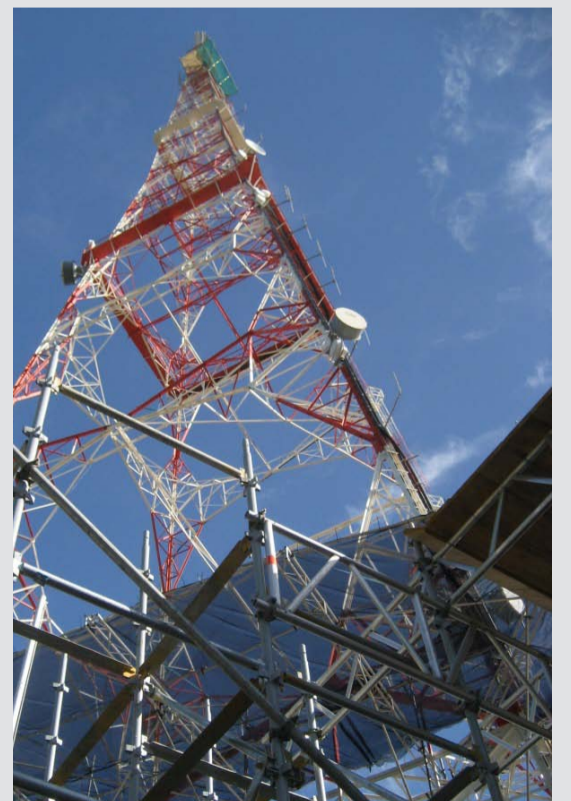

## Channel 10 Studios Scaffold

ECB Scaffolding was asked if they could come up with a solution for this overhead protection job at the Channel 10 Studios in the Brisbane suburb of Mt Coot-tha. Staff at Channel 10 still needed access to the studios while new transmitters were installed on the 200m high TV Tower above.

ECB Scaffolding decided the best way was using Layher 450 and 750mm aluminium beams on their existing Kwikstage, demonstrating that Layher aluminium beams can be used as an effective solution with any scaffold system.

Thank you to Campbell Beattie and Scott Wallace of ECB Scaffolding for the use of these photos.
