

FEATURED JOB

Crane Scaffold

Scaffolding this crane at the Port of Napier, New Zealand, presented a few technical challenges for Scafit, as well as ensuring health and safety concerns were adequately addressed.

“It was like scaffolding in a bowl of spaghetti,” said James Winter, Supervisor for Scafit. The scaffold needed different bay sizes off the U-bridging ledgers to adapt to the changing contours of the crane.

“Comprehensive planning and the input from the client, the Port, and Department of Labour were instrumental in achieving a successful, incident-free project.”

Thank you to David Crowley of Scafit for the use of these photos.
