

FEATURED JOB

Grolsch Bottle Stunt Tower

If scaffolding does not provide enough thrills, try doing a super base jump off a 70m high Grolsch beer bottle.

Layher Netherlands designed and built this free-standing heavy duty tower for the Zwarte Cross 2009. 5,000 0.25m ledgers were used to construct a heavy duty base, after which point the tower was constructed using 2.07m bays.

Videos of the hair raising stunts are on the website.

Thank you to Layher Netherlands for the use these photos.
