

# FEATURED JOB

## Offshore Scaffold

Transfield Worley found that Layher scaffolding demonstrated its advantages over conventional tube and clip scaffolding once again on this project 135 km offshore in Western Australia. The key advantages were health and safety and speed of installation on a project to construct a crane to a tight schedule.

Layher scaffolding was selected for the project having already demonstrated its advantages on an earlier shutdown. "Layher was found to be 30% lighter and up to 50% quicker to install compared with tube and clip," said Dale Haylock, NRA Implementation Manager.

Thank you to Dale Haylock, NRA Implementation Manager, Transfield Worley for these photos.
