

FEATURED JOB

Otago University Birdcage

New Zealand's University of Otago Medical School embarked on a quick build project and due to the urgency it was not possible to stage it in the traditional manner.

"The birdcage was built to undertake ceiling work before the ground floor concrete was poured!" said Andy Rich, Managing Director for Skyboys. "This meant we had to build off the first floor mezzanine. The access requirements changed daily but by using Layher Allround we were able to quickly and efficiently alter scaffolding".

Thank you to Andy Rich of Skyboys for the use of this photo.
